Good Afternoon Bob,

Thank you for the opportunity to provide input and comments on EPA-Tribe agreed well placement needs. I have attached well placement notes from our April 12th and April 18th well placement planning calls, sketch map for the moved well and additional recovery well area well, and referenced EPA guidance of well design and installation (referenced in our notes). The Tribe worked with Weston to further provide well depth elevation suggestions.

The attached notes were originally provided by Mr. Greenwater after our April 12,2107 well placement planning call, additional information was added in red to reflect our understanding from the April 18, 2017 call and provides the additional well elevation details requested.

Kristen Hanson
